(54) ELECTRONIC FILE MANAGEMENT SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To store and manage electronic files in the same classification state between respective file management devices by providing file managing devices for an intranet and the Internet respectively and sending and receiving inter-management devices electronic mails between the file management devices.

SOLUTION: A 1st file server 4 is always connected as a master file management device to an intranet 2 to classify, store, and manage electronic files regarding users being the employees of a company and also to send and receive user's electronic mails. A 2nd file server 6 is always connected as a slave file managing device to the Internet 1 to send and receive inter-server electronic mails (electronic mails between

management devices) between the 1st file server 4 and the 2nd file server 6 and also classify, store, and manage the electronic files.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
